— SEE OFFICE ACTION ON THE FOLLOWING PAGES —

Art Unit:

1. Receipt is acknowledged of the Amendment filed on 2/5/1999.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 6/1, 6/2, 7, 10, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gregg in view of Rapp.

Gregg shows a wheel chock having front and rear ramps, a flat bottom, securing means 4 and side wall 7.

The claimed invention differs only in the inclusion of a second side wall and the relative dimensions.

Rapp shows a wheel chock having front and rear ramps, securing means 23 and two side walls 14.

It would have been obvious to one of ordinary skill in the art to have included a second side wall on the wheel chock of Gregg in view of the teaching of Rapp so as to lock the wheel on both sides. The relative dimensions would be based on the size of the associated wheel to be chocked. The cleanliness of the wheel chock is dependent on the associated care of the device.

Re claim 2, note flat extending surface 4 on Gregg.

Art Unit:

Re-claims 6/1, 6/2, 7, the walls of Rapp project from the upper surface to the same degree as that shown by applicants.

Re-claims 10-11, the inclusion of holes in the flat extending surface of Gregg would have been obvious to one of ordinary skill in the art as a common type of fastening means and a substitute of known equivalent fasteners.

Re-claim 12, the recited method of use is inherent in Gregg, as modified by Rapp, as discussed above.

4. Claims 3, 4, 6/3, 6/4, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gregg, as modified by Rapp as applied to claims 1-2 above, and further in view of Wilson et al.

The claimed invention differs from Gregg, as modified by Rapp, only in angles of the ramps.

Wilson et al. show the rear ramp having a greater slope than the front.

It would have been obvious to one of ordinary skill in the art to have formed the ramp portions at different angles so as to easily roll the vehicle into the chock as taught by Wilson et al.

Re-claims 8-9, Wilson et al. show rails as the wheel support elements.

5. Applicant's arguments filed 2/5/1999 have been fully considered but they are not persuasive. Though Rapp fails to show a unibody construction, Gregg clearly shows the chock as a body. As to the declarations, none of the Declarations come from any person associated with

Art Unit:

the art of wheel chocks. The Declarations also fail to discuss the prior art and how the claimed invention may differ from the prior art.

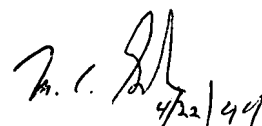

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning this communication should be directed to Mr. Graham at telephone number (703) 308-1113.
